Subject Index to Volume 146

Thermal and fluid design

Universal treatment of plumes and stresses for pressurized thermal shock evaluations, T.G. Theofanous, S. Angelini and H. Yan 146 (1994) 1

Flow visualization study of post-critical heat flux in inverted flow, I. Babelli, S.T. Revankar and M. Ishii 146 (1994) 15

An application of a higher order finite difference method to a natural convection experiment in the hot plenum of an LMFBR, O. Watanabe, Y. Motomiya, H. Takeda and T. Koga 146 (1994) 25

Impedance based flow reconstruction – A novel flow composition measuring technique for multi-phase-flows, F. Klug and F. Mayinger 146 (1994) 35

Turbulent bubbly two-phase flow data in a triangular duct, M. Lopez de Bertodano, R.T. Lahey, Jr. and O.C. Jones 146 (1994) 43

Sensitivity analysis of bubble size and probe geometry on the measurements of interfacial area concentration in gas–liquid two-phase flow, I. Kataoka, M. Ishii and A. Serizawa 146 (1994) 53

Measurements of turbulent velocity and temperature in axial flow through a heated rod bundle, L. Meyer 146 (1994) 71

Multiphase transients in the premixing of steam explosions, S. Angelini, E. Takara, W.W. Yuen and T.G. Theofanous 146 (1994) 83

Experiments on the mixing of molten uranium dioxide with water and initial comparisons with CHYMES code calculations, M.K. Denham, A.P. Tyler and D.F. Fletcher 146 (1994) 97

Fragmentation mechanisms based on single drop steam explosion experiments using flash X-ray radiography, G. Ciccarelli and D.L. Frost 146 (1994) 109

On the fundamental microinteractions that support the propagation of steam explosions, W.W. Yuen, X. Chen and T.G. Theofanous 146 (1994) 133

A crystallization theory of underwater aluminum ignition, M. Epstein and H.K. Fauske 146 (1994) 147

Numerical computation of underwater explosions due to fuel–coolant interactions, D.L. Frost, J.H.S. Lee and P. Thibault 146 (1994) 165

Generation of destructive forces during fuel/coolant interactions under severe reactivity initiated accident conditions, T. Fuketa and T. Fujishiro 146 (1994) 181

Molten aluminum alloy fuel fragmentation experiments, J.D. Gabor, R.T. Purviance, J.C. Cassulo and B.W. Spencer 146 (1994) 195

A general theory for flooding implementing cuspoids catastrophe, A.Y. Lafi and J.N. Reyes, Jr. 146 (1994) 207

Hyperbolicity breaking and flooding, J.Y. Lee and H.C. No 146 (1994) 225

Thermo-hydraulics during start-up in natural circulation boiling water reactors, J.-H. Chiang, M. Aritomi, R. Inoue and M. Mori 146 (1994) 241

Two-phase flow natural circulation characteristics inside BWR vessels, N. Abe, S. Yokobori, H. Nagasaka and S. Tsunoyama 146 (1994) 253

Natural convection between a vertical cylinder and a surrounding array, D.M. McEligot, J.E. O'Brien, C.M. Stoots, T.K. Larson, W.A. Christenson, D.C. Mecham and W.G. Lussie 146 (1994) 267

Nonlinear effects in two-phase flow dynamics, M. Pinheiro Rosa and M.Z. Podowski 146 (1994) 277

Issues affecting advanced passive light-water reactor safety analysis, R.J. Beelman, C.D. Fletcher and S.M. Modro 146 (1994) 289

Cooling performance of helium-gas/water coolers in HENDEL, Y. Inagaki, S.

Takada, H. Hayashi, T. Kobayashi, Y. Ohta, H. Shimomura and Y. Miyamoto 146 (1994) 301
Assessment of a heat transfer correlations package for water-cooled plasma-facing components in fusion reactors, S.T. Yin, A. Cardella, A.H. Abdelmessih, Z. Jin and B.P. Bromley 146 (1994) 311
MHD effects on liquid metal film flow, C. Liao, M.S. Kazimi and B. LaBombard 146 (1994) 325
Modeling supersonic flows through a gas-continuous two-fluid medium, J.C. Liu, P. Colella, P.F. Peterson and V.E. Schrock 146 (1994) 337
Solid breeder thermal transient under purge-line-break accidents, A.Y. Ying and M.A. Abdou 146 (1994) 349
Experimental study on scale effect on gas entrainment at free surface, Y. Eguchi and N. Tanaka 146 (1994) 363
Gas entrainment in the IHX vessel of top-entry loop-type LMFBR, Y. Eguchi, K. Yamamoto, T. Funada, N. Tanaka, S. Moriya, K. Tanimoto, K. Ogura, T. Suzuki and I. Maekawa 146 (1994) 373
Large scale experiments with a 5 MW sodium/air heat exchanger for decay heat removal, H. Stehle, G. Damm and W. Jansing 146 (1994) 383
Mixed convective flow penetration in vertical channels, D.W. Jerng and N.E. Todreas 146 (1994) 391
Passive heat removal experiments for an advanced HTR-module reactor pressure vessel and cavity design, L. Wolf, A. Kneer, R. Schulz, A. Giannikos and W. Häfner 146 (1994) 409
Multi-compartment hydrogen deflagration experiments and model development, T.F. Kanzleiter and K.O. Fischer 146 (1994) 417
A model for the effect of Inconel grid spacers on progression of damage in reactor core, L.J. Siefken and M.V. Olsen 146 (1994) 427
Coupled 3-D kinetics thermal-hydraulic analysis of Hot Zero Power main steam line breaks using RETRAN and STAR codes, M.A. Feltus 146 (1994) 439
Boiling two-phase flow under microgravity, M. Saito, N. Yamaoka, K. Miyazaki, M. Kinoshita and Y. Abe 146 (1994) 451
A network method for homogeneous, thermally expandable two-phase flow on unstructured triangular grids, T.A. Porsching and C.A. Hall 146 (1994) 473
Some computational challenges of developing efficient parallel algorithms for data-dependent computations in thermal-hydraulics supercomputer applications, S.B. Woodruff 146 (1994) 463
